

EAGLE SCOUTS

From the Eagle Scout Project Workbook

<http://www.scouting.org/scoutsource/BoyScouts/AdvancementandAwards/EagleWorkbookProcedures-PC.aspx>

"You must show that planning, development, and leadership will take place; and how the three factors will benefit a religious institution, a school, or your community."

You may consider the following city challenges to help you identify potential Eagle Scout projects, but the planning, development and leadership will be completely up to you. Eagle Scout project ideas will be approved when a scout approaches the city with a specific idea and plan to implement the idea.

Scouts should not expect the City to suggest or plan any aspect of the project for them.

Ready to Submit a Service Project Request?

**Elderly residents may have difficulty changing their own carbon monoxide or smoke detector batteries.

**House numbers on homes are incorrect, missing or are not visible from the roads which may result in emergency services delays.

**House numbers painted on curbs are sometimes helpful to emergency responders but not all homes have the numbers on the curb.

**Residents are often unprepared to evacuate with their pets in the case of a wildfire or other evacuation scenario Large animal evacuations have been difficult in previous wildfire incidents due to the lack of lead ropes, halters, etc.

**Youth sports teams (through the J.L. Sorenson recreation center or Herriman City events and recreation) may not have adequate first aid kits to distribute to coaches for use during practices or games.

**Fire hydrants may need to be repainted in certain areas of the city. Vehicle access gates along the city trails may need to be repainted.

**Horse arena panels may need to be repainted.

**The city would like to have plaques where the historic cabins are located to explain Herriman's history.

**Trees have died along city trail areas (specific trees are required by city ordinance and landscaping design).

**The city Pedal Palooza event needs individuals familiar with bicycle repair to provide services to resident children at Pedal Palooza each May.

**Signs in need of repair, replacement or reconsideration (e.g. yield versus stop sign) need to be identified.

**An evacuation center kit needs to be assembled with the correct forms, directional signs and supplies to be used in the event an evacuation center is established.

**Animal services has occasional needs for supplies

**The UPD needs working bicycles to use in their Bicycle Rodeo program teaching students bicycle safety.

**Some trail systems may have safety hazards (potholes, low-hanging tree limbs, etc.) that need to be identified and remedied.

**Occasionally playgrounds need to be repaired or replaced and volunteer labor is needed to construct the equipment.

There are many other ideas....

Please be creative!!!!!!
