**Emergency**  
 For emergencies, dial 9-1-1

City trails are monitored by the Herriman Police Trail Patrol. If you need to contact police in a non-emergency situation, call dispatch at 801-840-4000

# Herriman City Trail System Map

## Legend

City Trails	Mountain Trails
Dual Trail	Beginner Trail
Paved Trail	Intermediate Trail
Unpaved Trail	Advanced Trail (Biking Only)
Major Herriman Park	Hiking Only Trail

**Amenities**

Open Space or Park	Dog Waste Station	Trail Use Parking	Bench	Drinking Fountain	Bike Repair Station
--------------------	-------------------	-------------------	-------	-------------------	---------------------

**Sidewinder**

\*Buckaroo and Mutton-Bustin' are downhill-only mountain bike trails

**Mustang Loop**

\*Hardlick and Mojo are downhill-only mountain bike trails

## Rules and Practices

- Pets must be on leash at all times (*City Code 5-1F-8*)
- Clean up after your pets. Waste stations are provided at many trailheads with trash and extra bags
- Don't litter. Please pick up some trash if you see it
- Unauthorized motor vehicle use is prohibited on all Herriman City trails and open space
- Always ride in control. Many tight corners exist that can hide other trail users from view
- Plan ahead. Check the day's weather forecast and bring extra water, snacks, and sunscreen
- Building new trails or features is prohibited
- Bikers must yield to hikers and equestrians
- Stay on designated trails. Failure to do so causes erosion and harms native vegetation
- Please respect private property at all times

## Wet Conditions

- If mud sticks to your wheels, heels, or hooves, turn around. This causes damage to the trails and increases erosion
- Ride/run through small puddles on the trail. Going around widens the trail and makes it harder to maintain

## Rattlesnakes

Keep an eye out for rattlesnakes. Give them plenty of space. If bitten, stay calm and seek medical help.

# Beginner Trails

## Paved City Trails 23 mi

These flat, paved trails offer an easy way to move about the city. Many of the trails are accompanied by a gravel trail suitable for equestrians or runners looking for a softer surface. All city paved trails receive regular snow removal in the winter to help keep them open year round. Come and explore the many parks and open spaces that these trails connect!

## Midas Creek 1.6 mi

The Midas Creek Trail offers a fairly level stroll through the heart of northern Herriman. From the Copper Creek neighborhood to Pioneer Street, this is a pleasant route for a jog or walk.

## Sidewinder 0.6 mi

Sidewinder connects the lower part of the Blackridge Trail to the north side of Diamondback. This trail offers a scenic view of the valley in just a short hike.

## Buckaroo .3 mi

*(downhill biking only)*  
A beginner trail built with a focus on new riders, giving them an area to practice riding over small obstacles, small banked turns, and changing trail conditions.

## Mutton-Bustin' .3 mi

*(downhill biking only)*  
A beginner trail built with a focus on new riders, giving them an area to practice riding over small obstacles, small banked turns, and changing trail conditions.

# Intermediate Trails

## Blackridge 0.9 mi

Blackridge is the main access trail leaving Blackridge Reservoir. Leaving the parking lot, you can find a small sign with a map and other useful information. A bike repair stand is also located here equipped with a tire pump and some useful tools. This trail sees lots of traffic from people of all ages and user groups. Enjoy the views while passing through.

## Diamondback 1.7 mi

The Diamondback Trail rises above Sidewinder and connects to the Herriman BST. With the north end of the trail connecting to local neighborhoods, it provides a quick escape from the trail and back into town. This trail features a bench installed by a local Eagle Scout overlooking the valley.

## Herriman BST 1.5 mi

Starting on the west end of Herriman, the Bonneville Shoreline Trail moves west/east and generally is treated as an out-and-back ride. Part of the valley-wide Bonneville Shoreline Trail system, the Herriman BST contours along the ridge, providing great views of the valley. This trail will continue to be expanded in the future.

## Mustang 1.0 mi

Mustang jumps off from Eric's Trail and provides a quick loop filled with some easy climbs and small features to the side of the trail. Enjoy the views of the valley and take a break under one of the many trees providing shade on a hot day.

## Eric's Trail 4.8 mi

Eric's is a popular trail with many features bikers will enjoy, ranging from bermed turns and technical rock sections to small jumps and drops. Hikers and runners will enjoy this trail as well for its flow and consistent climbs and descents. Keep an eye out for wildlife! Deer, foxes, rabbits, and multiple species of birds and snakes can be seen along the trail.

## Mojo 0.8 mi

*(downhill biking only)*  
A downhill biking trail featuring jumps, table tops, and sweeping bermed turns running towards the Camp Williams border. This is a great trail to build confidence and make several laps thanks the easily-climbed Mosey Trail.

## Juniper Canyon

This trail network will be seeing several trail updates and redesigns in the future as the canyon is developed. It will offer trails for all skill levels.

## Footloose 0.4 mi

*(hiking only)*  
Providing a break from mountain bike traffic, Footloose is Herriman's hiking-only trail. Dipping down into a ravine filled with juniper trees and oak brush, it provides a cool place to take a break. Climbing quickly up the hill to the south, it crosses Eric's Trail several times on its way to the top of a small peak that offers expansive views of the valley. Future plans for this trail include extending it to form a large, hiking-only loop.

## Mosey .8 mi

Mosey traverses across a basin connecting Rawhide in the West to Eric's in the East. Also serves as the return trail for the Mojo trail.

## Rawhide 0.6 mi

Rawhide Trail is a rocky climb constructed with volunteer trail builders and connects to the Hardlick downhill trail. Rawhide places you high on the ridgeline overlooking the city, providing great views of the Wasatch Front and Camp Williams. The rocky trail challenges riders on the climb up and will eventually connect to several new trails.

## Yellow Fork Canyon

Very popular with equestrians, Yellow Fork Canyon is located to the southwest of Herriman, outside city boundaries. Yellow Fork provides opportunities to escape the city for hiking, riding, bird watching, and picnics with the family. Keep an eye out for spring wildflowers, cool running creeks, and wildlife.

# Advanced Trails

## Hardlick 0.8 mi

*(downhill biking only)*  
Hardlick was Herriman's first downhill, mountain bike-only trail. Built to work with the terrain, Hardlick features several rock drops, jumps, and big turns. This expert-only trail is machine-built, providing a wide trail with several different line choices, making each run different from the last.

**!** Trail running, hiking, horses, dogs, and uphill biking are not allowed on downhill, biking-only trails.

**Please stay on the trail.**

**Staying on the path reduces erosion and preserves natural vegetation.**

# Who Should Yield?

## Bikes vs. Bikes

If two bikes traveling in opposite directions meet, the rider moving uphill has the right of way. If you are riding the same direction as another rider, give a friendly greeting and let them know you would like to pass. Give them plenty of space and wait until it is safe to do so.

## Bikes vs. Horses

Bikers should be aware that horses can be found on the trails at any time. Approach slowly and let them know you are there in a calm, friendly manner. Get off your bike and move to the side of the trail and let the horse pass.

## Hikers vs. Horses

Equestrians can be found using our local trails. If your paths connect, the hiker should calmly step to the side of the trail and let the rider and horses pass.

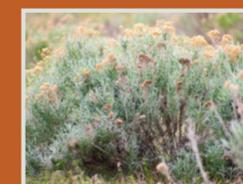

## Bikes vs. Hikers

Bikes are to pull over for hikers when traveling in opposite directions. If both are moving in the same direction, give a friendly greeting to let them know you are there and would like to pass. Wait until it is safe and give plenty of room.

## Hikers vs. Hikers

Give the hiker traveling uphill the right of way. If you are coming downhill, there is a good chance you will see the uphill traveler first and have time to step to the side to let them pass.

# Plants Along Your Path

**Rabbitbrush**  
*Chrysothamnus nauseosus*

**Chokecherry**  
*Prunus virginiana*

**Larkspur**  
*Delphinium andersonii*

**Longleaf Phlox**  
*Phlox longifolia*

**Yarrow**  
*Achillea millifolium*

**Mountain Mahogany**  
*Cercocarpus ledifolius*

**Bitterbrush**  
*Purshia tridentata*

**Indian Paintbrush**  
*Castilleja chromosa*

**Rocky Mtn. Juniper**  
*Juniperus scopulorum*
