For over 50 years, medical experts have raised a voice of warning denouncing certain substances that are harmful to the human body. As a result of these declarations, the government instituted labeling requirements in 1965, requiring cigarette packs to state: “Caution: Cigarette Smoking May Be Hazardous to Your Health.” In subsequent years, this warning was updated to include, “Warning: The Surgeon General Has Determined That Cigarette Smoke Contains Carbon Monoxide, Which Is Known To Cause Lung Cancer and Heart Disease.” In 1985, the Federal Government required a warning label on alcohol beverages to “inform and remind the American public of the health hazards that may result from the consumption or abuse of alcoholic beverages.” In 1988, the Alcoholic Beverage Labeling Act was instituted requiring a warning statement on containers of alcohol beverages that “The act of drinking alcoholic beverages during pregnancy damages the health of the fetus.” In 1994, the Alcohol and Tobacco Tax and Trade Bureau strengthened their regulations to “inform the American public of the health hazards that may result from the consumption of alcoholic beverages.” In 2006, the FDA required a safety statement on oral medications containing the ingredient THC, an ingredient found in marijuana that is associated with respiratory and cardiovascular health effects. In 2012, the FDA required a safety label on opioid medications warning the user of “the serious risks of misuse, abuse, addiction, overdose and death.”

An additional activity that is equally harmful and addicting and which is making great inroads into the lives of our young people is the use of e-cigarettes, better known as vaping. This injurious substance is gaining widespread popularity based on the pretense that it is much safer to use than the consumption of tobacco in all of its forms. While the usage among adults is relatively low at 3.5%, this is not the case among the youth. Since 2011, there has been a ten-fold increase in use among high school students... and a nearly nine-fold increase in use among middle school students.” In a survey conducted in 2015, it was revealed that e-cigarette usage was 9.5% among 8th graders, 14% among 10th graders and 16.2% among 12th graders. While in some cases vaping has been successful in assisting individuals to overcome their dependence on tobacco products, the large majority of users do not succeed in their attempts to quit. In fact, reports from the FDA state that the “risk of using e-cigarettes is not limited to the individual who uses them. Exposure to secondhand aerosol has been linked with adverse health effects, including irritation of the respiratory tract, and the development of cough, wheezing, chest pain, respiratory infection, and lung inflammation.”

We must recognize that e-cigarettes are not the answer to our smokers’ addiction. They are merely another vehicle to access nicotine. In fact, if anything, they are more addictive than traditional cigarettes as they deliver nicotine at a faster rate and are often used in conjunction with traditional cigarettes. Just this week, the American Heart Association released a statement about the effects of vaping and stated: “We continue to encourage the use of proven, FDA approved tobacco cessation therapies, such as nicotine replacement therapy or bupropion, in patients attempting to quit smoking. The use of e-cigarettes is associated with nicotine addiction and may be associated with smoking relapse.”

As a City Council, we are truly making decisions that will affect this community for decades to come, and given the gravity of those decisions we must be collaborative. In essence, we would require developers to meet with the affected area of a project (typically 300 feet surrounding the project, although some projects would require greater outreach) at the outset of the project as a mandatory step for approval. This is not a city meeting, but rather an informal meeting with the developer and residents with the intent of explaining the vision of the project, gauging concerns, answering questions, hearing suggestions on better implementation, outlining timelines and educating on the general project. This process was informally put into place with the Anthem Development and we found the resident feedback to be invaluable in our decision-making as council members and felt the developer better understood the needs and desires of the community. We will continue with this effort and, it is my hope it will become a formal part of the development process to require developers meet our higher standards of communication.

We already meet the required standards for public meetings, but I am encouraging a higher standard that recognizes educating the public earlier in the process and soliciting feedback will, more often than not, improve the final project and certainly make the process less painful and more pleasant for all involved. We value your opinion! This citizen survey (anticipated to be launched in the spring) was unanimously approved by the city council as part of the 2016-17 budget. We already meet the required standards for public meetings, but I am encouraging a higher standard that recognizes educating the public earlier in the process and soliciting feedback will, more often than not, improve the final project and certainly make the process less painful and more pleasant for all involved. In essence, we would require developers to meet with the affected area of a project (typically 300 feet surrounding the project, although some projects would require greater outreach) at the outset of the project as a mandatory step for approval. This is not a city meeting, but rather an informal meeting with the developer and residents with the intent of explaining the vision of the project, gauging concerns, answering questions, hearing suggestions on better implementation, outlining timelines and educating on the general project. This process was informally put into place with the Anthem Development and we found the resident feedback to be invaluable in our decision-making as council members and felt the developer better understood the needs and desires of the community. We will continue with this effort and, it is my hope it will become a formal part of the development process to require developers meet our higher standards of communication.

- Encourage regular resident feedback with an ongoing citizen survey
- Given our city communications background, it is not surprising my primary concern is one of improving the city-citizen connection. On that front, I’m most proud of my ability to successfully advocate for the HBURC Official Resident Survey, unanimously approved by the city council as part of the 2016-17 budget.

We value your opinion! This citizen survey (anticipated to be launched in the spring) will establish a tradition of regularly measuring citizen opinions, identify your concerns, offer the opportunity to rate our service delivery, and let us know where we can improve and encourage resident engagement in the direction and vision of our community.
Space Heaters
Riley Pilgrim, Battalion Chief
With the cold winter weather in full effect, the Herriman Fire Authority would like to remind residents to be extra cautious when using space heaters and other heating elements both indoors and in other areas of your property. Please be mindful of where these heaters are placed, and be sure that flammables are a minimum of three (3) feet away from the heater. Also be sure they are out of the reach of small children and pets.

If you have heating elements outside with animals, please be sure to follow the same steps as above. Also, if it requires any electrical modification, please consult a qualified electrician. There have been a few close calls already this winter with animal enclosures catching fire due to electrical problems and threatening both the animals and primary properties of residents.

Notice of Municipal Offices
Notice is hereby given that Herriman City will hold a non-partisan municipal general election on November 7, 2017 to elect a Mayor and two (2) City Council positions to serve four-year terms. City Council positions will be elected from Districts 2 and 3 with the Mayoral position being at-large. Candidate filing period begins June 1, 2017 during regular business hours and ends on June 7, 2017 at 5:00 pm. Declaration of Candidacy Forms or Nomination Petitions must be filed in person with the City Recorder at 13011 South 12700 West during regular business hours.

Food Drive
Quaid Green, Youth Council PIO
The Herriman City Youth Council is hard at work bringing their ideas to life! There is currently a competition across the Wasatch Front between many different youth councils to see who can raise the most funds, and help to resupply the food banks and shelters around Utah that often find themselves drained after the holidays. Our largest food donation day was January 29th, but we’re always on the lookout, so we hope to continue receiving food donations of any kind through February 15th. Donations may be dropped off at the Herriman City Offices. We urge all who can, to show a little charity by donating food and helping our Youth Council’s around the state, to give back and help our Utah communities.

Recently Approved Ordinances
Ordinance 2016-41
An ordinance authorizing a text change to the land use ordinance section 10-4-1 amending the Planning Commission chapter.

Ordinance 2016-42
An ordinance rezoning property located at approximately 7211 West 1830 South from A-1 to A-30.

Ordinance 2016-43
An ordinance rezoning 10.85 acres of property located at 15400 South 3300 West from R-2-15 to RM and C-2.

Ordinance 2016-44
An ordinance rezoning 7.71 acres of property located at 15400 South 3200 West from A-1 to RM and C-2.

Ordinance 2016-45
An ordinance adopting the Community Reinvestment Project Area Plan for the Herriman Anthem Community Reinvestment Project Area.

Proper Grading & Drainage
Kathleen White, Permit Technician
With all the wet weather we have had so far this winter, we are bracing for a potential wet spring that could magnify any grading or drainage issues that may exist in your yard. As a new home is completed, minimum grading requirements are enforced, but as people landscape, many of those drainage measures are changed or removed.

All properties are required to maintain drainage (excess water from storms or sprinkling systems) on their own property or to an approved drainage easement and out to the street. Lots shall be graded to fall at a minimum of 6” within the first 10’ away from the house or to the property line if there is not 10’ from the house, so water won’t flood into your yard. Typically, a swale is installed at the property line between houses so water coming off the houses will run away from the houses and to the swale at the property line then out to the street where storm drains are located to collect excess runoff. Areas where slopes do not allow for this grading design, swales are installed somewhere within the property or at the top of retaining walls to catch runoff and direct it to a safe location (see sample diagrams).

If water is getting into your house, make sure you have a slope going away from the house to help water run away from your windows and foundation. Also make sure your downspout extensions are on and directing water to a safe location. Rainy weather is a perfect opportunity to check how water is running on your property. If you change your existing grading/landscaping or install new landscaping, please keep drainage in mind so you keep your house and your neighbor’s house safe from flooding.

Herriman City elected officials and staff have been busily preparing for the upcoming Legislative session. Keep an eye on our newsletters for session outcomes from our Legislators. The Legislative corner will provide information encompassing issues and priorities of your state legislators as they represent their districts.

GoV 101
Herriman City held our first GoV 101 class on January 9th. This course was focused on City Budget. People turned up from residents, both in person and on Facebook Live. We hope the information on the upcoming classes will only improve.

These courses are held to benefit our community, in order to increase their knowledge on the inner workings of local government.

Announcement Hub
Have you seen an issue that needs the City’s attention? Snap a picture, send the issue, and we will post it on our website! Please include the subject line and then list your interests for those unable to attend in person.

We have a certain topic you would like to see classes on? Email info@herriman.org. Just note “GoV 101” in the subject line and then list your interests in the body.

Today is Monday, February 13, 2017. A really nice day for some outdoor fun! Our school system is closed this week due to snow, but we are headed for some warmer weather. Remember to bring some water with you if you go outside.

Women's History Month Celebration
We are excited to welcome Senator Howard A. Stephenson, Senator Lincoln Fillmore, Senator Jacob L. Anderegg, and Senator John Kamil. They will be speaking on the Supreme Court and its impact on Utah and the United States.

Read something interesting about any of our state legislators recently?

Please send questions to recorder@herriman.org
Herriman City Holds its First Annual Candy Cane Hunt!

Herriman City held its first annual Candy Cane Hunt on December 12th and it was a massive success! Hundreds showed up to hunt for 2500 candy canes, eat over 500 cookies, drink 30 cans of hot cocoa, see Santa, and have a chance to win one of three different prizes.

Thanks for making it a success!

GOV 101
Herriman City held our first Gov 101 class on January 9th. This course was focused on Understanding our local government. We had a great turnout of residents, both in person and on Facebook Live. We hope the knowledge gained from the upcoming classes will only improve.

These courses are held to benefit our community, in order to increase their knowledge on the inner workings of local government.

WHEN ARE CLASSES?
Classes are held in the Herriman City Council Chambers

• Wednesday, February 15, 2017, 6:00pm
Class Subject: Land Use - General Plan and Zoning Process

• Tuesday, February 21, 2017, 6:00pm
Class Subject: Economic Development

***Additional Classes will be posted soon

Classes will be broadcast on Facebook Live for those unable to attend in person.

Have a certain topic you would like to see covered in future courses? Email info@herriman.org. Just note “Gov 101” in the subject line and then list your interests in the body.

Have you seen an issue that needs the City’s attention? Snap a picture, send the issue, and see results with the Herriman Mobile App LocalMatters.

understanding the toxicity of emerging products."

An additional activity that is equally harmful and addicting and which is making great inroads into the lives of our young people is the use of e-cigarettes, better known as vaping. This injurious substance is gaining widespread popularity based on the pretense that it is much safer to use than the combustion of tobacco in all of its forms. While the usage among adults is relatively low at 3.5%, this is not the case among the youth. Since 2011, there has been a ten-fold increase in use among high school students... and a nearly nine-fold increase in use among middle schoolers. In a survey conducted in 2015, it was revealed that e-cigarette usage was 9.5% among 8th graders, 14% among 10th graders and 16.2% among 12th graders.

An additional activity to the issue of vaping is the distribution of these products with the intent of protecting the health and well-being of individuals. In 1965, the Federal Government required a warning label be placed on cigarette packs which stated, "Caution: Cigarette Smoking May Be Hazardous to Your Health." In subsequent years, this label was updated to: "Warning: The Surgeon General's Report Has Linked Cigarette Smoking to Cancer, Heart Disease, Stroke, Coronary Heart Disease, and Emphysema." Common sense would suggest that anything we inhale produces mind-altering effects.

The vapor is manufactured through the heating of “a propylene glycol or vegetable glycerin-based liquid” which contains “nicotine, flavoring and other chemicals and metals.” Some users will use the e-cigarette or similar device to vape other synthetic drugs or the chemical THC, an ingredient found in marijuana that produces mind-altering effects. In 1988, the Alcoholic Beverage Labeling Act was instituted requiring a warning statement on containers of alcohol beverages to “inform and remind the American public of the health hazards that may result from the consumption or abuse of alcoholic beverages.” In March of this year, the FDA required a safety label on opioid medications warning the user of “the serious risks of misuse, abuse, addiction, overdose and death.”

While in some cases vaping has been successful in assisting individuals to overcome their dependence on tobacco products, it shouldn’t be viewed as a substance that is innocent and benign. Common sense would suggest that anything we inhale and exhale into our lungs, regardless of the substance, will be harmful. In a recent report on vaping usage, researchers declared that vaping can inhibit the immune system making a user “more susceptible to any kind of infection.” Additional side effects were behavioral changes “that are reflective of increased — or hyper — activity” and an increase in asthma and other respiratory issues. Addressing other potential risks to vaping, Neal Benowitz of the University of California-San Francisco said in a recent statement that the conclusion of the report: “We’re really at the beginning of understanding the toxicity of emerging products.”

As we consider the risks of vaping - both known and unknown, I encourage the youth to not give in to public perception and peer pressure and escape the Vape. For continued information on health, follow Healthy Herriman on Facebook.

Wasatch Front Waste & Recycling Updates

Did you know that we provide landfill vouchers to residents? These vouchers give Herriman residents up to $10 off one load of acceptable materials. You can obtain these vouchers at Herriman City Hall.

If your garbage or recycle can is broken or damaged, please call our office at 385-666-6325. We will come and repair your cans for free. You can also complete an online service order request on our website at www.wasatchfrontwaste.org/service-request.

We are now on Facebook. Please “like” our Facebook page. This is the best and quickest way to notify you of tips, issues, and important announcements that may impact your service.
